SUMMARY

Full-stack developer and ML enthusiast skilled in React.js, Node.js, MongoDB, Python, and TensorFlow. Experienced building RESTful APIs, responsive UIs, and AI-powered applications. Strong problem-solving, communication, and team collaboration skills; seeking a software development or ML engineering role.

EDUCATION

Assam University Silchar <i>B.Tech, Electronics and Communication Engineering</i>	Oct 2022 – May 2025 CGPA: 6.6 / 10.0
Kendriya Vidyalaya Tinsukia <i>Senior Secondary (XII)</i>	May 2020 72.4%
Hindi English High School <i>Higher Secondary (X)</i>	Apr 2018 75%

EXPERIENCE

NIT Silchar <i>Machine Learning Intern</i>	Jun 2025 – Jul 2025
- Built a Hybrid CNN+HOG model for Sign Language Alphabet Classification, improving feature extraction accuracy by ~15% over baseline CNN. - Integrated HOG descriptors with CNN feature maps using Python, TensorFlow/Keras, and OpenCV; applied data augmentation and hyperparameter tuning to improve model generalization. - Performed data preprocessing and analysis with Scikit-learn; collaborated with the research team on evaluation across multiple test datasets.	
Elevate Labs <i>Web Development Intern</i>	May 2025 – Jun 2025
- Developed scalable responsive web pages using CSS Flexbox, Grid, and media queries, ensuring consistent UI across mobile, tablet, and desktop. - Integrated a third-party payment gateway API, handling end-to-end transaction flow and secure data handling in an agile team environment. - Collaborated with cross-functional team members to improve UI consistency and overall user experience across multiple platform breakpoints.	

PROJECTS

MedTrack <i>React.js, Node.js, Express.js, MongoDB, RESTful APIs, Chart.js</i>
- Full-stack healthcare app with MVC architecture; JWT-based authentication and role-based access control with secure RESTful CRUD APIs for 3 user roles. - Integrated real-time medicine reminders and interactive health dashboards for BP and sugar monitoring using Chart.js for data visualization. - Designed optimized MongoDB schemas for medicine adherence, health logs, and emergency alerts to support remote family monitoring.
AI-Powered Subscription Tracker <i>React.js, Node.js, Express.js, MongoDB, NLP, Machine Learning</i>
- Built NLP-based email parsing to auto-detect subscription receipts and extract billing details, reducing manual entry by ~80%. - Implemented predictive analytics to identify unused subscriptions and generate intelligent savings suggestions for users. - Designed secure RESTful APIs with JWT authentication and expense visualization dashboards; developed using agile methodology with CI/CD workflows.

TECHNICAL SKILLS

Languages: C, C++, Python, SQL, JavaScript, TypeScript
Web: HTML5, CSS3, React.js, Node.js, Express.js, RESTful APIs, Three.js
AI / Data: TensorFlow, Keras, OpenCV, Scikit-learn, NLP, Machine Learning, Data Analysis
Tools: Git, GitHub, MongoDB, Postman, CI/CD (GitHub Actions), Docker (basic), Agile
Soft Skills: Problem Solving, Team Collaboration, Communication, Agile Methodologies

ACHIEVEMENTS

UNESCO Youth Hackathon 2025 – Participant; submitted project under the theme “Youth Leading the Way: Building MIL Solutions for Impact,” demonstrating problem solving and communication skills in a global competition.
